     Pr&A. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

The invention describes an isolated antibody (I) that specifically binds to an epitope specifically bound by an antibody expressed by a specific clone where (I) binds to and neutralises botulinum neurotoxin type A (BoNT/A). An isolated antibody (I) that specifically binds to an epitope specifically bound by an antibody expressed by a clone chosen from clone 25, C25, C39, 1C6, 3D12, B4, 1F3, huC25, A11, A22, WR1(V), WR1(T), 3-1, 3-8, 3-10 and ING1, where (I) binds to and neutralizes botulinum neurotoxin type A (BoNT/A). Also described are: a polypeptide (II) comprising BoNT/A neutralising epitope having an epitope that is

New isolated antibody that neutralizes botulinum neurotoxin type A, useful for diagnosing botulism or for treating pathologies associated with botulinum neurotoxin poisoning.

Example 1; SEQ ID NO 87; 110pp; English.

WPI; 2004-652009/63.

The following are disclosed: a pharmaceutical composition comprising (I), and a kit comprising (I), (I) is useful for neutralising south for neutralising a botulinum neurotoxin which involves contacting neurotoxin with (I) in surplus, where each of (I) is specific for a different epitope of the botulinum neurotoxin and the combination of antibodies shows greater toxin neutralisation than the single antibodies in surplus. (I) is useful for diagnosing the botulism or for treating pathologies associated with botulinum neurotoxin poisoning. (I) exhibits specificity and affinity towards BoNT/A. (I) enables rapid detection or diagnosis of botulism. This is the amino acid sequence of a mouse light chain variable fragment anti-botulinum toxin
                                                                                                                                          useful for arayivering --- with botulinum neurotoxin poisoning.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    antibacterial; antibody; botulinum neurotoxin type A; BONT/A; BONT/A neutralising epitope; anti-botulinum neurotoxin antibody; toxin neurralisation; botulinum neurotoxin poisoning; mouse; light chain variable region; single chain antibody; scFv.
                                                                                                       Example 1; SEQ ID NO 88; 110pp; English.
                                                                                                                                                                                                        New isolated antibody that neutralizes botulinum neurotoxin type A, useful for diagnosing botulism or for treating pathologies associated
                                                                                                                                                                                                                                                                                                             WPI; 2004-652009/63.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               31-AUG-1998; 98US-00144886.

CC clone where (I) binds to and neutralises botulinum neurotoxin type A CC (BoNT/A). An isolated antibody (I) that specifically binds to an epitope CC specifically bound by an antibody expressed by a clone chosen from clone CS25, C25, C39, 1C6, 3D12, B4, 1F3, huC25, kT1, kT2, kT1(V), kT1(T), 3-1, CC 3-8, 3-10 and ING1, where (I) binds to ahd neutralizes botulinum CC neurotoxin type A (BONT/A). Also described are: a polypeptide (II) CC producing (I); and a composition (III) comprising source and in (I) comprising source and in (I) continum neurotoxin antibodies, where each antibody is specific for a clifferent epitope of a botulinum neurotoxin and the combination of CC antibodies shows greater toxin neutralisation than the single antibodies in surplus. The following are disclosed: a pharmaceutical composition CC comprising (I); and a kit comprising (I). (I) is useful for neutralising BONT/A antibody and for neutralising a botulinum neurotoxin which CC involves contacting neurotoxin with (I) in surplus, where each of (I) is specific for a different epitope of the botulinum neurotoxin and the combination of antibodies shows greater toxin neutralisation than the specific for a different epitope of the botulinum neurotoxin and the combination of antibodies shows greater toxin neutralisation than the single antibodies in surplus. (I) is useful for neutralisation of corporate antibodies shows greater toxin neutralisation than the single antibodies in surplus. (I) is useful for diagnosing the botulism corporate antibodies associated with botulinum neurotoxin and the combination of antibodies associated with botulinum neurotoxin corporates associated with botulinum neurotoxin acid sequence of a mouse light chain variable fragment anti-botulinum toxin care.

An isolated antibody (I) that specifically binds to an epitope specifically bound by an antibody expressed by a clone chosen from clone (C (BoNT/A). An isolated antibody (I) that specifically binds to an epitope expecifically bound by an antibody expressed by a clone chosen from clone (C 3-8, 3-10 and ING1, Where (I) binds to and neutralizes botulinum (C comprising BoNT/A neutralising epitope having an epitope that is groducing (I); and a composition (II) comprising several anticolor (I); producing (I); and a composition (II) comprising several anticolor (I); producing (I); and a composition (II) comprising several anticolor (I); and a present each antibody is specific for a different epitope of a botulinum neurotoxin and the combination of comprising (I); and a kit comprising (I) is useful for neutralising (I) and a kit comprising (I) is useful for neutralising (I) is useful for neutralising (I) and a kit comprising (I) is useful for neutralising (I) is useful for a different epitope of the botulinum neurotoxin which (I) is specific for a different epitope of the botulinum neurotoxin and the combination of antibodies shows greater toxin neutralisation than the single antibodies in surplus. (I) is useful for diagnosing the botulism (I) exhibits specificity and affinity towards BONT/A. (I) enables rapid detection or diagnosis of botulism. This is the amino acid composition of a mouse light chain variable fragment anti-botulinum toxin (I) serve.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         8

                                                                                                                                                                                                                                                                                     Ś
                                                                                                                                                                                 밁
                                                                                                                                                                                                           8
                                                                                                                                                                                                                                                                                                                                                                                                                            Cc claimed anti-human RANK ligand (RANK-L) murine monoclonal antibody (mab) cc laimed anti-human RANK ligand (RANK-L) murine monoclonal antibody (mab) cobtained by immunising CB6 f1 mice with human RANK-L protein, and fusing spleen cells with X61-A98.63 myeloma cells. 19H22 mb is specific for cc man RANK-L, having a binding affinity characterised by a dissociation constant of about 10 power -10 M. RANK-L is a member of the tumour constant of about 10 power -10 M. RANK-L is a member of the tumour constant of about 10 power -10 M. RANK-L is a member of the tumour chimeric and humanised 19H22 antibodies. The invention provides altered, chimeric and humanised 19H22 antibodies, including Fab or F(ab')2 cc fragments, antibodies comprising the light and heavy chain variable cregions of 19H22, and antibodies comprising the complementarity conditions of 19H22. These are used in methods for the constant dark induced osteoperic diseases, including concer, constants induced osteoperis, metastatic and primary bone cancer, constants induced osteoperis, metastatic and primary bone cancer, constants induced osteoperis, metastatic, and immune diseases concluding psoriasis, insulin dependent diabetes, inflammatory bowel concernation of the antibodies, using isolated mucleic acids constants conditions associated with Thi T-cell activity or osteoclast condevelopment and activation, in particular those listed above

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           CC call binding agent and a cytotoxic conjugate which comprises a CC call binding agent and a cytotoxic agent, where the call binding agent to CA6 glycotope. Preferably, the call binding agent is the murine CC anti-CA6 monoclonal antibody DS6 or their epitope-binding fragments or a CC humanized version of the same. The cytotoxic agent is chosen from CC maytansinoid compounds, taxoid compounds, CC-1065 compounds. The invention CC may be useful for the production of compounds with a cytostatic, CC immunosuppressive or virucide activity acting as stimulators of CC apoptosis. The invention is useful for inhibiting growth of a cell CC expressing CA6 glycotope and may be used for treating a subject having a CC cancer (for example serous ovarian carcinoma, endometriod ovarian CC carcinoma, neoplasm of the uterine cervix, neoplasm of the endometrius, neoplasm of the vulva, breast carcinoma, pancreatic tumor or tumor of the CC curchfelium), in which CA6 glycotope is expressed or overexpressed. In addition, the invention may be useful for treating autoimmune diseases, CC graft rejections or viral infections. The present sequence is that of a crejion of the mouse and protein which was used to demonstrate homology with a region of the mouse DS6 antibody light chain protein during the cx exemplification of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Query Match

CC reversibly from a repertoire of polypeptides that unfolds reversibly and comprises providing a polypeptides that unfolds from unfolded or misfolded bolypeptides. The method cc polypeptides from unfolded or misfolded bolypeptides. The method cc comprises providing a polypeptides; unfolding at least a portion of the unfolded cc polypeptides, and recovering at least one polypeptide that unfolds comprisibly and has the selectable characteristic from the refolded cc polypeptides, and recovering at least one polypeptide that unfolds creversibly and has the selectable characteristic from the refolded cc polypeptides, and recovering a polypeptide that unfolds creversibly from a repertoire of polypeptides that unfolds creversibly from a repertoire of polypeptides that unfolds reversibly. The clibrary or repertoire is useful for selecting a polypeptide comprising an antibody variable domain that unfolds reversibly or a polypeptide that cc refolds reversibly and comprising an antibody format. The polypeptide is useful in the manufacture of a medicament for diagnosing, treating or preventing a disease or medical condition mediated by a cytokine, cc cytokine receptor, enzyme, enzyme of action or DNA binding protein, such cc an inflammatory state, allergic hypersensitivity, cancer, bacterial or viral infection or an autoimmune disorder, e.g., asthma, psoriasis, Type c region associated with the protein purification method of the invention.

                                                     CC comprises: providing a polypeptide display system comprising the cc repertoire of displayed polypeptides; unfolding at least a portion of the unfolded CC polypeptides; and recovering at least one polypeptide that unfolded CC polypeptides; and recovering at least one polypeptide that unfolded CC portion. The method is useful in recovering a polypeptide that unfolds CC reversibly and has the selectable characteristic from the refolded CC portion. The method is useful in recovering a polypeptide that unfolds comprising an antibody variable domain that unfolds reversibly. The CC useful in the manufacture of polypeptides that unfolds reversibly and comprising an antibody format. The polypeptide is CC useful in the manufacture of a medicament for diagnosing, treating or preventing a disease or medical condition mediated by a cytokine, CC useful infection or an autoimmune disorder, e.g., asthma, psoriasis, Type CC viral infection or an autoimmune disorder, e.g., asthma, psoriasis, Type CC region associated with the protein purification method of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Recovering a polypeptide that unfolds reversibly from a repertoire of polypeptides for treating e.g., cancer, by unfolding a portion of the displayed polypeptides and refolding a portion of the unfolded
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         14-MAY-2003; 2003US-0470340P.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           S
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 吊
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   밁
                                                                                This invention relates to the novel tredtment of an autoimmune disease chat utilises an antibody/ autoantigen donstruct. Specifically, it refers contains a peptide autoantigen that is linked to an antibody raised against an example of the presenting cell (APC) receptor. The present invention describes a contain antibody raised against an example of the relating diabetes mellitus by inducing an immune tolerance to an autoantigen, which can be chosen from glutamic acid decarboxylase (GAD), insulin or a heat shock protein (HSP), as well as epitopes derived from each thereof or beta cell antigens that are linked to an APC consent from DC-SIGNR, MHC, toll receptor or manose receptor amongst chers, which is expressed on the surfade of the APC. The antibody/ conters, which is expressed on the surfade of the APC. The antibody/ contents, which is expressed on the surfade of the APC. The antibody/ content then works to interfere with the interaction between the APC and immune cells such as autoreactive T cells, and hence contidiate to a proliferation. Accordingly, such compositions exhibit contidiates to interactions. Note that the single chain antibodies (scrye) used in this specification contain both variable light and heavy chain cregions connected by a linker, their short length makes these antibody contains to the receptor is preserved. This polypeptide sequence is a light chain murine anti-human L-SIGN (hL-SIGN) antibody protein of the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            autoimmune disease;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        S
The invention describes an isolated antibody (I) that specifically binds to an epitope specifically bound by an antibody expressed by a specific clone where (I) binds to and neutralises botulinum neurotoxin type A (BONT/A). An isolated antibody (I) that specifically binds to an epitope specifically bound by an antibody expressed by a clone chosen from clone $25, C25, C39, IC6, 3D12, B4, IF3, huC25, Ar1, Ar2, WR1(V), WR1(T), 3-1, CC 3-8, 3-10 and ING1, Where (I) binds to and neutralizes botulinum composition (II) comprising BONT/A neutralising epitope having an epitope that is specifically bound by an antibody expressed by clones as mentioned in (I) is producing (I); and a composition (III) comprising several antibotulinum neurotoxin antibodies, where each antibody is specific for a contibodies shows greater toxin neutralisation than the single antibodies in surplus. The following are disclosed: a pharmaceutical composition (C comprising (I); and a kit comprising (I). (I) is useful for neutralising C showly and hit comprising (I). (I) is useful for neutralising C showly antibodies and a botulinum neurotoxin which (I) in surplus, where each of (I) is specific for a different epitope of the botulinum neurotoxin than the composition of involves contacting neurotoxin with (I) in surplus, where each of (I) is specific for a different epitope of the botulinum neurotoxin than the composition of antibodies shows greater toxin neutralisation than the composition of antibodies in surplus. (I) is useful for diagnosing the botulism correction than the composition of antibodies associated with botulinum neurotoxin than the composition than the composition of antibodies associated with botulinum neurotoxin than the composition than the composition of antibodies shows greater toxin neutralisation than the composition of antibodies shows greater toxin neutralisation than the composition than the composition than the composition of the composition of a composition of antibodies shows greater toxin neutralisation than the composi
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Query Match

                                                   Anti-epidermal growth factor receptor (EGFR) single chain antibodies and antibodies constructed from anti-EGFR antibody fragments can be used for diagnosis of tumours and assessment of tumour growth in vitro and in vivo. They may also be used in a pharmaceutical composition for the therapy of e.g. melanomas, gliomas and carcinomas. The antibodies and fragments are derived from mice but are humanised so as to cause minimum reaction against them. They are produced using the phage antibody library. They are produced using the phage antibody 1AAT04011-T04026 and AAR79858-R79873)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          poisoning. (I) exhibits specificity and affinity towards BoNT/A. enables rapid detection or diagnosis of botulism. This is the ami sequence of a mouse light chain variable fragment anti-botulinum scFv.

                                                                                                                                                                                                                                                                                                                                                                                             Anti-epidermal growth factor receptor (EGFR) single chain antibodies and antibodies constructed from anti-EGFR antibody fragments can be used for diagnosis of tumours and assessment of tumour growth in vitro and in vivo. They may also be used in a pharmaceutical composition for the therapy of e.g. melanomas, gliomas and carcinomas. The antibodies and fragments are derived from mice but are humanised so as to cause minimum reaction against them. They are produced using the phage antibody library. They are produced using the phage antibody library. (See
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Single chain antibody; antibody; epidermal growth factor receptor; EGPR; tumour; cancer; glioma; melanoma; carcinoma; diagnosis; assessment; phage antibody library.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                02-JUL-1996 (first entry)

                                                           The invention discloses a modified antibody (or fragment) directed to the compidermal growth factor receptor (EGFR or Her 1). The antibody is communogenically non-immunogenic, or less immunogenic, than any original communogenically non-modified antibody directed to the same receptor when composed to the immune system of a given species and compared with the non condified antibody. Compared with a non-modified antibody, the modified compared with a non-modified antibody, the modified compared with a non-modified antibody. The same receptor when compared with a non-modified antibody. The same receptor when compared with a non-modified antibody. The same receptor when the mon-modified antibody. The consecutive amino acid residues of the 13-mer T-cell epitope having a consecutive amino acid residues of the 13-mer T-cell epitope having a consecutive amino acid residues of the 13-mer T-cell epitope having a consecutive amino acid residues of the 13-mer T-cell epitope having a consecutive amino acid residues of the 13-mer T-cell epitope having a consecutive amino acid residues of the 13-mer T-cell epitope having a consecutive aminopenically modified antibody having substantially no or less consecutive aminopenically modified antibody is useful in antibody therapy to treat cancers or consecutive modified antibody is useful in antibody therapy to treat cancers or consecutive modified antibody is substantially non-modified antibody of insecutive consecutive and with reduced or absent consecutive species, has enhanced properties and with reduced or absent consecutive and with reduced or absent consecu
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Carr

Hanlon M,
                                                                                                                                                                                                                                                                                                                                                                                              The invention relates to an immunogenically modified fusion protein derived from a parent fusion protein, comprising first and second proteins/polypeptides, where the first protein is an immunoglobulin molecule or its fragment and the second protein is non-immunoglobulin target polypeptide each linked to the other directly or by a linker molecule. The immunogenically modified fusion protein is useful in combining known favourable properties of a composition or in creating new properties of a composition which elicits biological or pharmacological efficacy without having undesirable physiological effects such as nausea or gastric upset. The present sequence is mouse 425 antibody Vx protein. This sequence is used in the exemplification of the invention
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 New modified fusion protein with reduced immunogenicity, useful combining favorable properties of a composition, comprises an immunoglobulin molecule linked to a non-immunoglobulin target
                                                                                                                                                                                                                                                                                                                                                  Sequence 106 AA;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Example 18; Page

Donor splice sites were recreated in the 3' flanking regions to allow correct splicing of the variable and constant regions. The 5' sequence was altered to introduce an initiation codon. The cloned antibody may be used int the prodn of reshaped or humanised antibodies which are less immunogenic than native antibodies and may be used to combat e.g. glioma, melanoma or carcinoma.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             The present invention describes a method of producing humanised immunoglobulins involving expressing in a cell a nucleic acid encoding a humanised version of an immunoglobulin. This is obtained by comparing a donor and human immunoglobulin and producing a combined antibody which contains part of each. These are useful in the treatment of graft-versus-host disease, transplant rejection, autoimmune diseases such as diabetes, rheumatoid arthritis, myasthenia gravis, multiple sclerosis and systemic lugus erythematosus, herpes infections, (MV virus infections and myeloid leukaemia. The present sequence is an antibody used to demonstrate the method of the invention
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    07-JUN-1995;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              30-JAN-2001.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              US6180370-B1
